Items that will be provided for you upon your arrival:
1. Summer Engineering Academy T-Shirt
2. College of Engineering Lanyard to carry meal card and key to room
3. Summer Engineering Academy Notebook
4. Water bottle to be used at camp

Optional items available for purchase:
1. College of Engineering T-shirt
2. Parking pass if student drives themselves to camp
3. Linen Set if student does not bring their own

Special Note:
Tucson’s summer weather can include very warm days with temperatures ranging from 95-110 degrees. Be sure to bring clothing that is appropriate. However, the majority of our activities will occur inside, therefore you may need a sweatshirt if the air conditioning is too cold. You are also visiting the desert and it can be very dry. We will provide a water bottle for you and strongly encourage you to drink more water than you normally would. During the summer we often experience monsoons. During our monsoon storms there may be rainstorms with a lot of rain in a short period of time especially in July. Bring rain gear if desired.
